## Work Experience

**“Plexisoft” 2014 till now as E-Commerce developer engineer**

**“Plexisoft software”**

*PHP Yii Framework, MySql, JavaScript, JQuery, mongoDb*

**“Novembit CJSC” 2013 - 2014 as senior backend developer engineer**

*“matea.com” is a web multi-Vendor Shop.*

*This Shop is built on responsive layout for all screen resolutions.*

*It gives opportunity to show and manage products of different Vendors.*

*There are 2 payment methods, Ogone and PayPal.*

*Used technologies and languages:*

*PHP MVC, MySql, JavaScript, JQuery,(Ogone payment API, PayPal API)*

*“LaPoste” is a web site where users give questions and the specialist gives the answers . There is a chance to approve or decline questions.*

*Used technologies and languages:*

*PHP Yii Framework, MySql, JavaScript, JQuery*

### **“AlphaSoft” 2011-2012 as team lead / senior developer engineer**

*Mostly worked on eCommerce applications such as Magento, PrestaShop and developed custom Zend Framework shops. Also based on WordPress developed portals, themes and plugins.*

*Developed and architect small social network platforms.*

*Based on Zend Framework developed few websites for vehicles sell, rent, etc..*

*“CarsClub.am” is website which is developed specially for selling vehicles, vehicle accessories and parts, also here users are able to post their own statements.*

*Used technologies and languages:*

*Zend Framework, PHP, MySql, JavaScript, JQuery, etc..*

*Worked on huge project which gives ability remotely installation of platforms, blogs and etc... on a on hosting servers (eg. Wordpress, Joomla, Magento, etc...).*

*Depending on our custom themes or at the user discretion, gives ability to manage content through remote accesses (eg. ftp, MySQL, etc..), also we had implemented dashboard where users are able to manage advertisements and see statistic for each of them. Famous hosting providers had implemented same thing (e.g. in GoDaddy.com where you are able to install blogs and platforms such as WordPress, Joomla, etc... without any difficulties).*

*Used technologies and languages:*

*PHP, MySql, JavaScript, JQuery, etc..*

## **“Freelancer” from 2009 till now**

*“Supporter” (supportus.com.au)*

*Web application based on Zend Framework .*

*It scraps information about different products and corporations from API's or HTML.(Used APIs CommissionMonster, CommissionFactory, DGM ... etc.)*

*Used technologies and languages:*

*Zend Framework, PHP, MySql, Dojo Toolkit*

*“MyTravelMap” is a travel agency portal, where users can book tours, hotels and air tickets and integrated mutiple API's.*

*Used technologies and languages:*

*Web Services, PHP, MySql*

*Database migrations from one platform to another ones.*

*Fixed bugs and added new features for already developed web sites and applications such as Magento, Backbone/Marionette, Zend Framework, Yii Framework, Wordpress, Joomla, etc..*

*“thdental.am” is a dental labaratory, where users can get information about their products*

*Used technologies and languages:*

*PHP, WordPress, MySql*
